

Viewing Historical Mining Tenements (Tailor Display)

Transcript

In this video, you will learn how to display dead mining tenements in the TENGRAPH system.

Start by loading a map through making an Enquiry. Please refer to the TENGRAPH Introductory video for instructions.

From the top task bar menu, click on the Selections option. From the drop down menu select Tailor Display. A further menu will open, select Tenements.

The Tailor Tenements dialogue box will open. Click on the Select All button in the bottom left corner and press Apply to switch on the dead tenement display. Dead tenements are shown with a line drawn through the label.

Your map now shows you all dead tenements with current mining tenements. To display recently cancelled unsurveyed tenements, click on the Cancelled in the Last number of years options.

Change the number of years to 5 then click Apply. In this example we have changed the display setting to show only unsurveyed tenements cancelled in the last 5 years. Experiment by making different dead tenement selections and viewing the results.

Click Cancel to close.

If you require further assistance, please contact a Title Services Officer on (08)9222 3626. For technical problems contact the IT Service Desk (08) 9222 0777.
