

Airborne Geophysical Survey Register and Data Archive
Survey registration form

Survey name: _____ **No.** _____
(GSWA use only)

Commissioned by: _____

Contractor: _____ *Job No.* _____ *Date:* _____

Flight lines *Spacing:* _____ *Direction:* _____ *Height:* _____ *Datum:* _____

Tie lines *Spacing:* _____ *Direction:* _____ *Total km:* _____ *Cost/km:* _____

Methods: Mag Rad EM DTM Gravity MSS Other _____

Attachments: Report Located data Gridded data 256-ch. Radiometric data

Reporting conditions Please mark and initial acceptance of **only one option** from **1 2 3 4** — see over for summary or refer to policy description for details.

1 Airborne Survey Reporting Policy Conditions

By selecting this option you agree that the data may be released to Open File on or after the indicated release date unless the Department receives prior written advice from the owner of the data that they have been placed with a nominated third-party agent for unrestricted commercial sale together with a copy of the sales agreement (see conditions overleaf).

Indicate data status (one only) Confidential — Release date will be 5 years from survey end date.

Multi-client — Sales agent _____

Acceptance (initials) _____ Immediate Open file release. _____

2 Standard Mining Act conditions (initials) _____ Data released via WAMEX when report becomes Open file. (GSWA use only: Report A# _____)

3 Petroleum Act conditions (initials) _____ Data released after 3 years from survey end date.

4 GSWA Data Archive (initials) _____ For surveys not subject to obligatory submission for storage in GSWA Archive.

Authorisation

I declare that (Company) _____ is the undisputed owner of the data that are submitted and that I am duly authorised to submit these data under the conditions indicated.

I agree that the following survey attributes may be made available for public access:

1. Survey location and specifications.
2. 200 x 200 pixel (maximum size) image(s) of the data.

Signature: _____ Date: _____

Name: _____ Position: _____

Phone: _____ Email: _____

GSWA use only

Comment _____

Survey data and documentation requirements

When a survey has been flown and basic data processing completed the following information should be submitted:

1. Survey registration form.
2. Survey equipment, data acquisition and processing details (ideally, a copy of the contractor's Operations and Processing Report). Reports in Microsoft Word or Adobe Acrobat PDF files are preferred.
3. Final located (including multi-channel radiometric, EM or multi-scanner data if applicable) and gridded data (including a header file describing the data format) on disk or hard drive.

The simplest mechanism for reporting items 2 and 3 will be to have the survey contractor provide, at the time of final data delivery, an extra copy of all data, maps and reports as digital files on disk for transmittal to the Department.

Reporting conditions

One of the following options must be chosen — refer to the latest policy description document for details.

- **Reporting policy provisions** — once-only reporting; five-year total confidentiality period (from date of survey completion) unless otherwise agreed; five-year multi-client conversion option.
- **Standard Mining Act provisions** — Data will be registered in WAMEX database and released under standard Mining Act conditions: multiple reporting of data over surrendered areas; maximum five-year partial confidentiality period; no multi-client conversion option.
- **Petroleum Act provisions** — non-interpretive data released to Open File after three years.
- **GSWA data archive** — indefinite confidentiality period. Option available only for surveys not subject to obligatory submission.

If filesize < 2 Gb, upload this form and accompanying data and documentation via our drop box (<http://dropbox.yousendit.com/MAGIX>). Otherwise send this form with data to:

*The Chief Geophysicist
Geological Survey of Western Australia
100 Plain Street, East Perth, WA 6004*
